Summary

Final-year B.Tech Computer Science student (CGPA 9.40) with experience building AI-powered backend systems and scalable software using Python, FastAPI, REST APIs, LangGraph, and SQL. Designed multi-agent applications, optimized LLM inference costs by 89%, and developed production-style APIs and evaluation pipelines. Strong foundation in Data Structures, Object-Oriented Programming, and System Design, seeking Software Development Engineer and AI Engineering roles.

Technical Skills

- **Programming Languages:** Python, Java, SQL
- **Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, System Design
- **Backend Development:** FastAPI, REST APIs, WebSockets, PostgreSQL
- **AI & GenAI:** LangChain, LangGraph, Retrieval-Augmented Generation (RAG), ChromaDB, Model Context Protocol (FastMCP)
- **Tools:** Git, Docker, Postman

Experience

• QuantJo (Chitrav Research Private Limited)

Software Engineering Intern – AI Platform

Jan 2026 – Jun 2026

- **Designed AI Retrieval Pipeline:** Designed and implemented an optimized retrieval pipeline for a Python code-generation agent, reducing per-request token consumption by ~89% through context optimization and on-demand retrieval, improving response latency and lowering inference costs.
- **Built Automated Evaluation Framework:** Designed and developed a 20-case automated regression testing framework combining deterministic AST validation with LLM-based evaluation to detect code-generation failures and instruction drift before deployment.
- **Implemented Real-Time Backend Services:** Developed FastAPI and WebSocket services to stream live AI agent events, enabling real-time visibility into intermediate reasoning steps and tool execution.
- **Secured Sensitive Credentials:** Implemented encryption for user API credentials and OAuth tokens using Python's cryptography library and environment-managed secrets to protect sensitive data at rest.

• ACM Student Chapter, KL University

Secretary

Jun 2023 – Jun 2024

- **Technical Leadership:** Organized technical workshops, coding events, and chapter activities while coordinating volunteers and increasing student participation.
- **Operations Management:** Managed chapter communications, documentation, and cross-team coordination to ensure smooth execution of year-long initiatives.

Projects

• PR Review Agent — AI-Powered Code Review System:

- Developed a multi-agent code review system using Python and LangGraph to automatically analyze GitHub pull requests for security vulnerabilities, bugs, and coding standard violations.
- Built a Retrieval-Augmented Generation (RAG) pipeline using AST-based code parsing, OpenAI embeddings, and ChromaDB vector search to generate project-aware code review suggestions.
- Implemented confidence-based filtering to automatically publish high-confidence review comments with inline fix recommendations, reducing false-positive feedback in developer workflows.

Tech Stack: Python, LangGraph, FastAPI, ChromaDB, OpenAI API, GitHub API, Docker

• TripPilot AI — Multi-Agent Travel Planner:

- Designed and developed an AI-powered travel planner that transforms natural language trip requests into personalized day-by-day itineraries using a coordinated multi-agent architecture.
- Integrated Google Maps, Directions, Places, and OpenWeather APIs through FastMCP tool servers to generate location-aware travel recommendations using live data.
- Implemented itinerary validation, real-time agent progress streaming with FastAPI and WebSockets, and containerized the application using Docker for deployment.

Tech Stack: Python, LangGraph, FastAPI, WebSockets, Docker, PostgreSQL, Google Maps API, OpenWeather API

Leadership & Certifications

- **Leadership:** Secretary, ACM KLH Chapter (2023–2024); organized technical workshops, hackathons, and Novus 2024 Fest, engaging 500+ students.
- **Certifications:** AWS Certified Cloud Practitioner — Microsoft Certified: Azure Data Fundamentals (DP-900) — Automation Anywhere Certified Advanced Automation Professional

Education

• Koneru Lakshmaiah Education Foundation (KL University)

Bachelor of Technology in Computer Science and Engineering CGPA: 9.40/10

Jul 2023 – Jul 2027

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks
- **Leadership:** Secretary, ACM KLH Chapter (2023–2024) — Organizing Committee, Novus 2024
